DV2
Task 1

Name: Weiyi Guo
Student ID: 3451534
Date: Tue 8 a.m. ~ 10 a.m. workshop

Topic: The Changing Map of Malaysia's Forest Reserves

Goal: The specific need is to make long-term forest reserve changes understandable to the malaysian public. National totals alone can hide state-level differences, so this visualization provides a clear map-based and chart-based view if where forest protection is improving, where it is declining, and why these patterns deserves attention.

Target audience: Malaysian public especially for people who are interested in environmental protection, climate resilience, and land-use issues but may not have technical knowledge of forestry data.

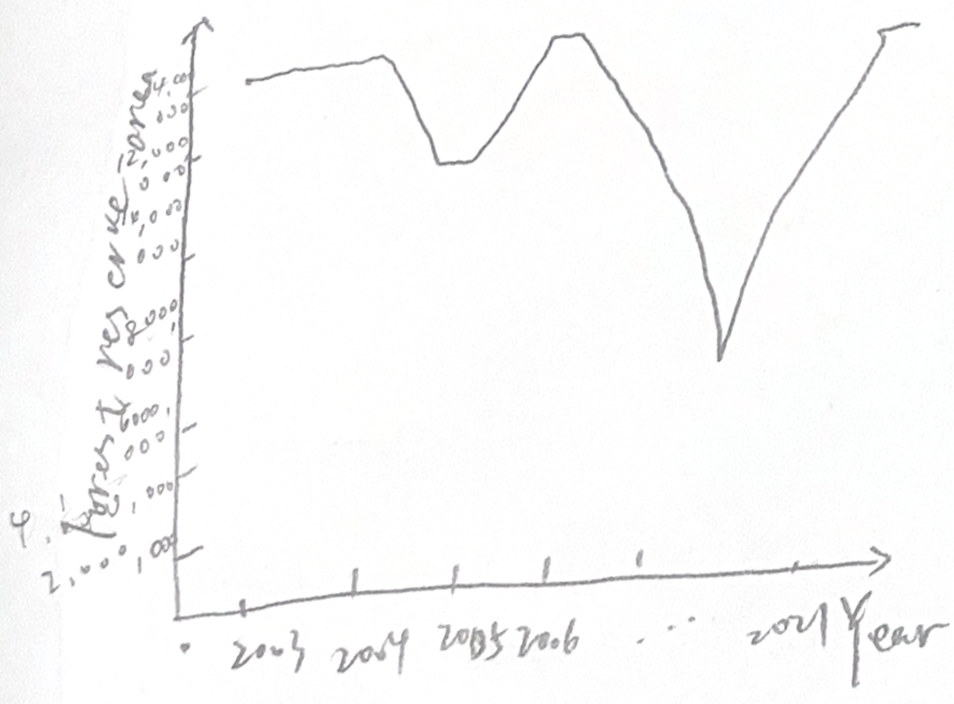

Solution: It is an interactive, story-driven web visualization that combines maps, trend charts, ranking charts, and contextual comparisons.

Task 2

The changing Map of Malaysia's Forest Reserves

Intro: .....

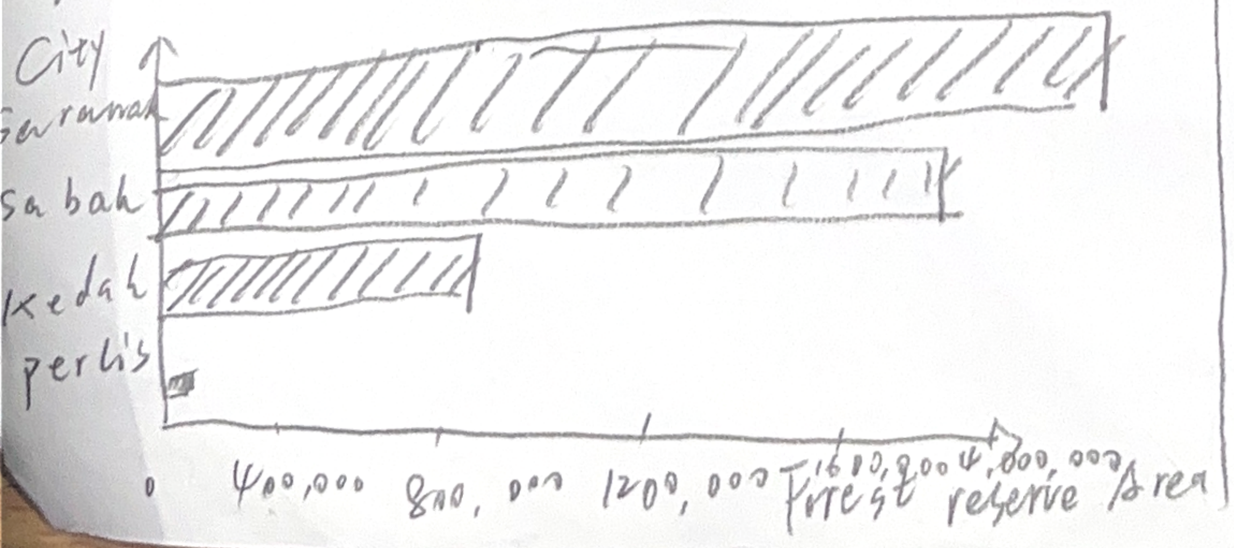

1. National Forest Reserve Trend (2003-2021)

2. STATE comparison

3. Ranked states by Total Forest Reserve Area (Latest Year)

4. Change from 2003 to Latest Year By State
